Carbon scarcity

• • • • • • • • • • • • • •

.

.

### Biomass - a scarce resource

- ... and not, in general, carbon neutral
- Climate neutrality requires biogene CO<sub>2</sub> for green fuels for aviation and CCS in the future
- Bioenergy accounts for more than two thirds
  of Denmark's renewable energy consumption
- Denmark imports a large share of its biomass for energy production
- Long-term strategy: Reduce Denmark's consumption of biomass
- Secure incentives to
  - > promote additional carbon uptake in forests
  - capture carbon emissions from incineration of biomass

# Security of electricity supply

. . . . . . . . . . . . .

#### Peak electricity demand will be challenged by declining power plant capacity

- An increasing share of inflexible demand will be covered by variable sources of power
- Oversized of max. capacity is the pivotal part of the solution
- However, in extreme weather situations we rely on imports
- Import potential is reduced by correlating weather patterns in Southern neighbouring countries
- $\rightarrow$  We will need flexible back up solutions

**Note**: The percentage reflects the share of inflexible consumption potentially being covered by dispatchable generation. **Source**: The Danish Council on Climate Change (2023), 'Security of electricity supply with high shares of solar and wind power'.

#### Stress test calculations are reassuring – but timely precautions are required

**Note**: Columns shows extra controllable capacity needed to maintain todays (low) level of power outages (GJ). Costs tags above the bars represent rough cost estimates (2022-prices)

# Renewables expansion: Sufficient speed & scale?

• • • • • • • • • • • • • • • • •

## Renewables expansion is delayed and at risk

TWh

Source: Amended from The Danish Council on Climate Change (2023), Statusrapport 2023.

# ... hence, so is clean PtX

Electrofuels require green electricity to avoid *increasing* CO<sub>2</sub> emissions

# 'Executive Summary' – how challenging?

Carbon scarcity

Speed & scale of renewables expansion

## Thank you for your attention!

Perito Moreno in Los Glaciares National Park, Argentina – on of the world's very few non-retreating glaciers ...
